

$$P = (5.0 \pm 0.6) \times 10^{-3} \text{mBar}$$

Fit:  $y = mx + c$   
 $m = \text{inf}$        $\pm \text{inf}$   
 $c = -\text{inf}$        $\pm \text{inf}$

Degrees of freedom = 5  
 Reduced  $\chi^2 = \text{nan}$

## Residuals
